

Axis Technical Group delivers leading edge document automation and related cutting-edge technology solutions that propel our clients to successfully achieve their business goals.

Our Healthcare client's most common pain points include:

- Existing teams preoccupied with supporting current systems
- Inability to migrate to newer technology platforms
- Expensive and time-consuming manual processes
- Inability to scale systems to support planned growth, including adding new offices, doctors and patients
- Inexperience with large scale technology projects

Background

Axis' client needed a centralized solution for supervisors to track patient eligibility status and document approval.

Solution & Benefits

- Allow multiple offices to view eligibility status
- Established workflow for eligibility reps to manage assigned requests and tasks
- Provides eligibility reps with complete view of patient benefits consumed and remaining

Background

Axis' client needed a credentials compliance management platform and portal.

Solution & Benefits

- Practitioner data pulled from primary sources for up-to-date credentials, licensure, and certifications
- Securely manages and stores providers' documents, credentials and licensure
- Alerts sent to DEA, state license and boards

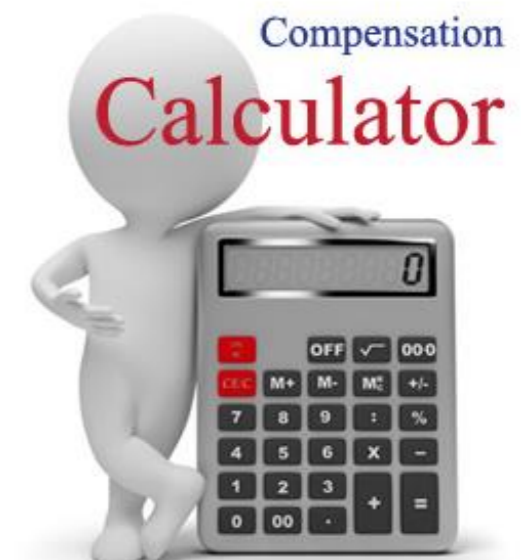

Background

Axis' client needed a compensation and incentive system for Providers.

Solution & Benefits

- Calculates provider pay and annual incentives based on the production revenue and office days
- Sends production alerts to providers so they can gauge productivity and forecast patient flow

Background

Axis' client needed to scale its operations integrating their enterprise CRM and ERP systems.

Solution & Benefits

- Development of custom applications to integrate with Salesforce
- Integration of inbound and outbound practice data with Workday

Background

Axis' client needed to improve an existing eligibility system prior to developing a new Plan Management System.

Solution & Benefits

- Reduce processing cost per eligibility request
- Reduces refunds to patients and/or insurance companies caused by inaccurate or untimely eligibility information
- Patient satisfaction increased with billing accuracy

Background

Axis' client needed to improve the accuracy, speed and clearing of patient insurance claims via automation.

Solution & Benefits

- Customization of role-based claim work queues
- Ability to split line adjustments across multiple procedures
- Significantly reduced processing time with an improved interface and practice management system integration

Background

Axis' client needed to setup fees and Alternative Minimum Benefits (AMB) for PPO carriers, as well as supplemental information and minimum guarantees for HMO carriers.

Solution & Benefits

- Delivered real-time fee schedule management
- Greatly simplified automated calculation of fees and fee schedules
- Improves patient satisfaction by eliminating increased financial burden

Background

Axis' client needed a primary Business Intelligence (BI) tool for nationwide operations reporting.

Solution & Benefits

- Consolidates systems into one standard reporting platform
- Eliminated redundant and duplicate reports
- Delivered consistency and metrics standardization

Background

Axis' client needed a new patient-focused interface to address multiple functionality gaps.

Solution & Benefits

- Significantly improves overall patient experience
- Synchronizes family member details, referral codes and medical alerts
- Protects for adult family members and gives them the ability to grant or deny access to primary account holders

Background

Axis' client needed to track quality, reliability and maintain an FDA audit trail of devices critical to human life.

Solution & Benefits

- Register patient assignment and follow-ups
- Support investigative team and call center
- Quickly respond to enhanced FDA reporting requirements
- Outsource business functions such as document scanning, indexing, data collection, validation and report writing

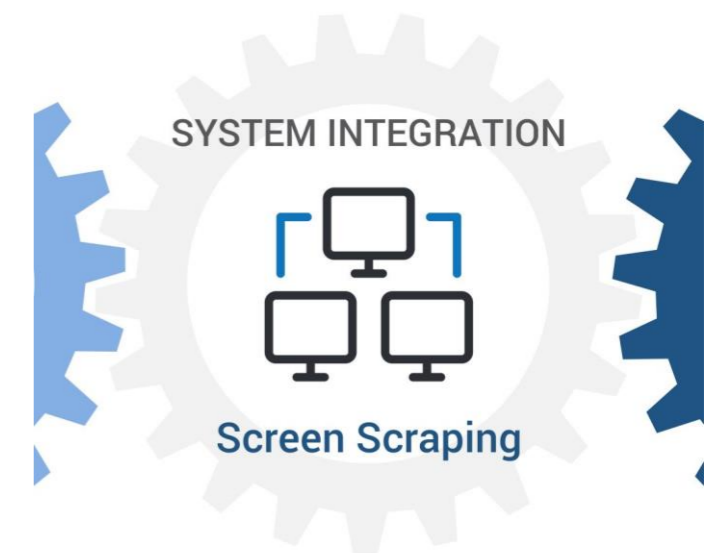

Background

Axis' client needed to collect data from insurance carrier website that was not API enabled.

Solution & Benefits

- Developed middle tier tool to scrape carrier websites and aggregate data
- Allows approx. 65-70% of eligibility checks to be imported vs. manual keying
- Reduces the average cost of each eligibility check from \$3.50 to \$2.50
